

10 Latest AI Model Providers (2025–2026)

1) ● OpenAI — GPT-5.5

- **Model:** GPT-5.5
- **Release:** April 23, 2026
- **Cutoff:** ~Late 2025 (typical frontier training window)
- **Context Window:** ~200K–1M tokens (varies by tier)
- **Cost:** \$\$\$ (premium API tier)
- **Public:** Yes (ChatGPT + API with restrictions)

When to use:

👉 **Best for structured reasoning + agents + coding**

- Strong logical reasoning, planning, and tool use
 - Balanced across coding + analysis + writing
-

2) ● Google DeepMind — Gemini 3.1 Pro

- **Model:** Gemini 3.1 Pro
- **Release:** Early 2026
- **Cutoff:** ~Late 2025
- **Context Window:** Up to ~1M tokens (some variants higher)
- **Cost:** \$\$–\$\$\$
- **Public:** Yes (Gemini Advanced / API)

When to use:

👉 **Best for long context + multimodal (video, docs)**

- Handles huge documents
 - Strong coding + structured tasks
-

3) ● Anthropic — Claude Opus 4.7

- **Model:** Claude Opus 4.7

- **Release:** April 2026
- **Cutoff:** ~Late 2025
- **Context Window:** ~200K–500K
- **Cost:** \$\$\$
- **Public:** Yes

When to use:

👉 **Best for safe reasoning + enterprise workflows**

- Very strong in long-form reasoning
 - High safety alignment
-

4) **xAI — Grok 4.20 Beta**

- **Model:** Grok 4.20
- **Release:** April 2026
- **Cutoff:** Near real-time (integrated search)
- **Context Window:** ~2M tokens
- **Cost:** \$\$
- **Public:** Limited (X Premium+ / API)

When to use:

👉 **Best for real-time + tool-augmented agents**

- Built-in live data access
 - Multi-agent workflows
-

5) **Meta — Llama 4**

- **Model:** Llama 4 (Scout / Maverick)
- **Release:** 2025 (widely used in 2026)
- **Cutoff:** ~2024–2025
- **Context Window:** ~128K–400K
- **Cost:** 💰 Free (open weights)

- **Public:** Yes (open-source)

When to use:

👉 **Best for self-hosted + fine-tuning**

- Cheap + customizable
 - Great for startups / infra control
-

6) ● **Mistral AI — Mistral Large 3**

- **Model:** Mistral Large 3
- **Release:** Dec 2025
- **Cutoff:** ~2025
- **Context Window:** ~128K–256K
- **Cost:** \$\$
- **Public:** Yes (API + some open variants)

When to use:

👉 **Best for lightweight + efficient reasoning**

- Strong European alternative
 - Cost-efficient vs OpenAI/Anthropic
-

7) ● **DeepSeek — DeepSeek V3.2 / V4**

- **Model:** DeepSeek V3.2
- **Release:** 2026
- **Cutoff:** ~2025
- **Context Window:** ~128K+
- **Cost:** 💰 Very cheap
- **Public:** Yes (open + API)

When to use:

👉 **Best for cost-efficient coding + reasoning**

- One of the cheapest high-performance models

- Strong developer adoption
-

8) 🟡 Zhipu AI — GLM 5.1

- **Model:** GLM 5.1
- **Release:** April 2026
- **Cutoff:** ~2025
- **Context Window:** ~128K
- **Cost:** \$-\$\$
- **Public:** Yes (API, China-focused)

When to use:

👉 **Best for Chinese + bilingual applications**

- Strong localization
 - Growing global presence
-

9) 🔵 Google — Gemma 4

- **Model:** Gemma 4 (26B etc.)
- **Release:** April 2026
- **Cutoff:** ~2025
- **Context Window:** ~32K–128K
- **Cost:** 💰 Free / low-cost
- **Public:** Yes (open models)

When to use:

👉 **Best for lightweight local deployment**

- Smaller than Gemini
 - Runs on consumer GPUs
-

10) 🟣 Meta (New Lab) — Muse Spark

- **Model:** Muse Spark

- **Release:** April 2026
- **Cutoff:** ~2025
- **Context Window:** Unknown (agent-focused)
- **Cost:** \$\$\$ (enterprise)
- **Public:** Limited

When to use:

👉 **Best for next-gen agent systems**

- Designed for autonomous AI workflows
- Early-stage but powerful

Provider	Model	Release Date	Knowledge Cutoff	Context Window	Token Cost (per 1M)	Public Access	When to Use
OpenAI	GPT-5.5	Apr 23, 2026	~Late 2025	~1M tokens	~\$5 in / \$30 out (est.)	Yes	Best for reasoning, coding, agents
Google DeepMind	Gemini 3.1 Pro	2026	~Late 2025	~1M–2M tokens	~\$2 / \$12	Yes	Best for long context + multimodal
Anthropic	Claude Opus 4.7	Apr 2026	~Late 2025	~1M tokens	~\$5 / \$25	Yes	Best for safe reasoning + enterprise AI
xAI	Grok 4	2026	Near real-time	~2M tokens	~\$0.20+ (est.)	Limited	Best for real-time + agents
Meta	Llama 4	2025	~2024–2025	~128K tokens	Free (open weights)	Yes	Best for self-hosting + fine-tuning
Mistral AI	Mistral Large 3	Dec 2025	~2025	~128K tokens	~\$0.02+	Yes	Best for efficient

Provider	Model	Release Date	Knowledge Cutoff	Context Window	Token Cost (per 1M)	Public Access	When to Use
							production use
DeepSeek	DeepSeek V4 / V3.2	2026	~2025	~128K–384K tokens	Very low (~\$0.02)	Yes	Best for cheap coding + reasoning
Zhipu AI	GLM-5	Feb 2026	~2025	~128K tokens	Low (\$–\$\$)	Yes	Best for Chinese + bilingual apps
Google	Gemma 4	Apr 2026	~2025	~32K–128K	Free / low	Yes	Best for local lightweight models
Meta (Research)	Muse Spark	Apr 2026	~2025	Not disclosed	\$\$\$	Limited	Best for AI agents / automation
